## Case No. H-1

(AIDS,HIV Positive, Hepatitis B)

From: "Rod"  
To: Michelle Levan  
Subject: Re: UPDATE  
Date: Wed, 14 May 2003 12:47:37 -0700

Michelle,

The best testimonial I can give is the way I look compared to two months ago. I am feeling just plain great, really looking good. People are shocked and surprised when they see me. This past month my energy has risen, no longer needing to sleep in the afternoon. I am back to my regular weight. The way I feel is honestly just plain remarkable, I'm praying that this well being does not go away. My Best,

Rod

## Case No. H-2

(Ovarian Cancer)

1. Patient's progress
  - a) Patient: 49 year-old female (Tokyo, Japan)
  - b) Chronological progress

Time and date	Progress	Details of treatment
1988 Jul 03	Hospitalized and operated for suspected hysterom voma In fact it was ovarian cancer	Ovary, fallopian tubes and caul removed surgically
1998 Jul-Dec	Discharged after operation and treatment continued as outpatient	Treated with anticancer drug post-surgery - CAP therapy (an ordinary tretment)
2000 Feb-Dec	Resumed chemotherapy - No improvement	Treated with anticancer drug - Paraplatin (a cisplatin derivative) Administered 10 courses given, one course per month (A total of 4,500 ml administered)
2001 Jan-mar	Different chemotherapy given - No improvement	Treated with anticancer drug - Taxol administered
2001 Jul 01	Dr. A. became physician-in-charge	
2001 Jul-Sep	Different chemotherapy given - Improved, the lesion almost disappeared	Treated with anticancer drup - IEpiP therapy (a modified CAP therapy)
2001 Nov 20	Hospitalized and operated at Ganken (Cancer Research)	Total hysterectomy and sufficient removal of caul. Appendectomy and removal of hard peritonium. Tumor excised, leaving less than 1 cm. - Cancer metastasized to diaphragm
2002 Feb 08	Chemotherapy resumed - Bone marrow suppression	Treated with anticancer drugs - DP therapy (a combination of taxol and cisplatin) Treatment given only once

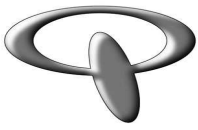

2002 Jun-Oct	Resumed chemotherapy - Cancer of the diaphragm	Treated with anticancer drug - Taxol administered (once a week)
2002 Nov 07	Ascites carcinoma spreads	
2002 Nov 20	Immunological tests conducted	
2002 Nov 21	Started intake of Atlas Agaricus Extract Mate - 1/4 <sup>th</sup> bottle per day (once in 4 hours)	Drank Atlas Agaricus Extract Mate daily from this date
2002 Nov 25	Rehospitalized as ascites started to accumulate again Resumed chemotherapy	Treated with anticancer drug - Camptothecin (CPT-11) administered 2 courses in 3 days
2002 Dec 06	Complication of enterostasis, Patient remained in a fasting state	Treated with anticancer drug - Camptothecin (CPT-11) administered, only once
2002 Dec 16	Patient resumed food intake (fluid diet) - Ascites greatly reduced	
	Intake of Atlas Agaricus Extract Mate - 1/2 <sup>th</sup> bottle per day (taken every 4 hours)	
2002 Dec 17	Stenosis of intestine discovered	
2002 Dec 20	CT and immunological tests conducted - Cancer discovered at three new sites in the large intestine, and the diaphragm Highest value of tumor marker recorded - Ascites decreased	
2002 Dec 31	Discharged once, but readmitted to hospital because of infection - Fever of 38 deg C and fasting state	Intravenous drip only. Continued drinking Atlas Agaricus Extract Mate
2003 Jan 07	Food intake resumed	

2. Results of immunological tests

Comparison of immunological test results of 2002 Nov 20 and 2002 Dec 20

Lymphocyte subset	Normal range	Nov 20	Dec 20
CD – 3 Mature T cells	53 – 90%	49.3%	54.1%
CD – 4 Helper T cells	22 – 60%	24.3%	38.7%
CD – 8 Suppressor T cells	16 – 51%	15.9%	12.4%
CD – 16 NK cells	4 – 40%	0.1%	40.2%
NK cell activity	18 – 40%	32.0%	-
CD – 19 Pan-B cells	1 – 13%	3.8%	2.6%
CD – 56		54.9%	52.25%

**Case No. H-3**

(Cancer)

Yori,

Mr. Gardner gave me the following comment. So, I want to e-mail it to you.

Since the Agaricus mushroom in my treatment with acupuncture I have seen a steady decrease in a tumor in my left leg over the past 6 months from the size of about 2 softballs down to less than the size of 2 tennis balls that is about 50% less!" and " I call it the magic mushroom! Cancer patients should definitely know about this!"

To Whom It May Concern:

My name is Alfredo Moreno, 58 years old and today is fourteen months since I was diagnosed with cancer in the rectum, plus cancer in the liver. Today I give thanks to Atlas Agaricus because after my faith in God this medicine keeps me alive because I have two months and half since I started to work. I work 5 or 6 hours, and go home and I'm still active, doing things that need to be done at home. One month ago I went to Mexican Border which is a seven hour drive from my town and their was no problem. I drive everyday, work is 80%. I feel energetic full of life because my day starts 7:00 a.m. and ends at 10:30p.m. I recommend this product to my friends when I have appointments with my oncologist, because people ask me what I do to be in this shape, and I simply tell them Atlas Agaricus, everyone is surprised my oncologist call me the "Miracle Man of the Year." Scientifically, I should be dead since September 2002. People call me to ask me about the product and experience with Atlas Agaricus.

Thank you

## Case No. H-5

(High PSA count)

*Written by:*

Mr. Jim C.

Wooster, OH 44691

In December of 2002 I was tested for prostate specific antigen on my annual test. The PSA count was 4.7 – up from 2.6 the prior year. The physician recommended trans-rectal ultrasound (TRUS) and 6 – sample biopsy.

I was unwilling to submit to tests, especially biopsy, due to possible side-effects and possible seeding (spreading) of cancer cells.

I started on Agaricus Bio and continued and over-the-counter prostate supplement (with multiple PHP-counteracting herbs). After a few weeks, I had another PSA test and free PSA test. My PSA dropped to 0.3, the lowest it had been in years!

The reason I tried Agaricus was based on extensive research I conducted on the internet and found this was the most powerful immune-enhancer I could find.

I'm not certain that I had prostate cancer, but the PSA of 4.7 plus free PSA percent of 14% put me in the 30% certain category, I was not willing to prove the point with a risky biopsy and the Agaricus results would indicate I at least probably had the regaining (not yet metastatic) of this.

## Case No. H-6

(High PSA count)

Greetings Mr. Takeda,

Naturally I'm very pleased with the outcome. Please see below:

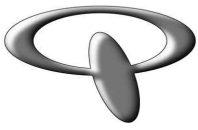

PSA Levels:

July 7, 1999	2.52
April 6, 2001	3.62
May 31, 2002	4.53

Used Atlas mushroom liquid March 2003 to May 7, 2003

April 18, 2003	2.85

## Case No. P-1

January 2, 2003

Dear Sirs:

We have a 6 year old Ragdoll male neutered cat that was diagnosed with non-specific auto-immune disease approx. 3 years ago. Since then we have battled bouts of non-eating, vomiting, dehydration, mental incapacity, urine incompetence, hair loss and so on. He has been hospitalized twice for re-hydration and meds including predisone and appetite boosters, along with anxiety drugs as he would get very anxious and seem to "lose" his whereabouts in the house often. He is strictly an indoor cat and acted as if he were 12 years old. His obvious symptoms were the anxiety, constant meowing, very slow movement and painful movement. It would take him many seconds to lay down and you could see him contemplating if it were even worth the movement that took. Approx. 4 months ago I was trying to get up the courage to call the vet for euthanasia as his quality of life seemed so bleak. That is when I thought to research herbs. We came across your product and it is truly a miracle. "Arnold", short for Arnold Schwartenkitty, who should weigh upwards to 15 lbs and had once weighed as low as 9lbs. (we anxiously watched the ounces come off at the vet appointments) is getting better and better every day. I started him on ½ a 300mg capsule daily but after two weeks upped the dose to a whole 300mg capsule daily. His color pattern, so long ago faded almost to nothing, has deepened to the most vibrant colors we have ever seen for him. He is almost 12 lbs., eats voraciously, and has even started to play occasionally. I cannot begin to tell you what a miracle we have witnessed firsthand all, we believe, due to your product.

I also have an auto-immune disease and have thought about trying the human capsules. My disease has manifested itself as early stages of arthritis-type symptoms and macular degeneration of one eye. (abnormal growth of blood vessels surrounding the center of vision). Thank you so much. Our vet cannot believe the difference!

## Case No. P-2

*Written by:*

Barbara Fabricant (retired)  
Director, Criminal Investigations, Humane Task Force, State of California

March 3-2003

We are treating a 12 year old female dog weighs 40 lbs. She has cancer in the shoulder. X-rays show 75% of the bone is gone. 3 vets advised anesthesia. Because the dog was in such pain, although she was taking 7 strong pain pills daily, the owners were ready to put her to sleep. On Feb 22, someone recommended they call me. I started them on Agaricus Extract Mate 5 drops daily.

They called me the next day to say they had only given her one pain pill and she was lively coming around plus trying to use her leg with the cancer. I suggested they put it in a sling because we did not want it broken. I spoke with Dr. Levan about the case on the 25<sup>th</sup>. She said they should have the dog tested for worms because the cancer breaks down the immune system and parasites take over. I called the owners and told them to take a sample of the dogs stool to the vet and have it tested for worms. They did and she had tape worm.

On March 1 – she had the shot to get rid of tapeworms. Now that the worm situation has been taken care of we are looking forward to increase in appetite and Atlas Agaricus killing the cancer. Thank you for making this possible you have given us hope where there was none.

Thank you.
